Dear KUDROT-E-KHUDA,

Re: Enclosed Application Agreement for Product Selling Website and Web Application System.

Young IT knows that developing a client-focused application requires both technical prowess and effective communication, therefore we only recruit the best to make sure you get both. Knowing that every customer is different, we work hard to always present a distinctive, affordable, and original proposal. We then follow it up with a superb delivery that is both on time and within budget.

We create a product selling website and web application system for you in accordance with your business requirements. In this agreement paper, we detail all characteristics that apply to our program. Please take the time to read it carefully, and if it fulfills your needs, sign to affirm your agreement.

Yours Sincerely
Delayer Hosain
Head
Brach for Application Development
Young IT Enclosed

1. Project Overview

Take use of technology and digitalization efforts in the twenty-first century. The technology we use every day has advanced. We create a method to simplify our business or professional lives. A website and a web application make up this project; the website is entirely information-based, and the web application has two modules with iCloud functionality.
